- 10 lbs. of dry glaze makes 1.25-1.5 gals of wet glaze.
- Our cone 6 glazes are dinnerware safe when used properly.
- None of our glazes, including raku, contain lead, barium or cadmium.
- Many of our glazes layer nicely with other brands of glaze.
- SMC glazes are tested on SMC clay bodies, we recommend testing colors before using on other brands of clay.
- For best firing results, Stone Mountain Clay & Glaze Co. recommends firing using a "slow glaze" setting in digital kilns.
- All of our wet glaze batches are test-fired before being sold.
